MASTER INSTALLATION, SERVICE & WARRANTY AGREEMENT

Version 3 - October 22, 2026

This Agreement is between Abstract Enterprises Security Systems, Inc. ("Provider") and the Client named on the Proposal, Scope of Work, estimate or invoice it accompanies, and is part of that document.

1. Scope; Change Orders

Provider performs only the work described in the Proposal / Scope of Work. Any added or changed work requires a written change order priced before it is performed.

2. Payment

Installations: a deposit of at least 50% is due to schedule the work; the balance is due upon completion, before the technician leaves the site. Service calls and diagnostic visits are billed 100% in advance. Equipment ordered for the Client cannot be returned or refunded once ordered.

3. Completion

Work is complete when the listed scope is installed and operating. Items outside the scope, or delayed by the Client, the Client's equipment, internet service or site conditions, do not delay payment for completed work.

4. Limited Warranty

4.1 Provider-supplied equipment carries a 1-year parts warranty from the installation date; Provider warrants its installation workmanship for 30 days. Labor, service calls and trip charges are not covered unless the Client purchased an extended warranty covering labor. 4.2 Excluded: surge, lightning, water, weather, vandalism, pests, impact, misuse, power or internet problems, and work by others. 4.3 Tampering, relocation or repair by others without Provider's prior written authorization voids the warranty. 4.4 The warranty is suspended while any balance is open. 4.5 Provider may require return of replaced hardware. 4.6 Client-supplied equipment carries no Provider warranty (Section 16).

5. Service Calls & Rates

Post-installation service calls, return trips and added labor are billed at Provider's published hourly rate for the job's area (Brooklyn $195.00 per hour), with a 3-hour minimum, unless the Proposal states a flat service-call fee. Rates for each area are provided on request and stated on the Proposal or invoice.

6. App / Remote Access

Remote viewing and phone alerts depend on the Client's internet service and on third-party apps and servers. Provider is not responsible for internet outages, slow upload speeds, app changes or discontinued manufacturer services.

7. Change Orders

Change orders must be agreed in writing (text or email is acceptable) and are billed in addition to the contract price.

8. Communication

Scheduling, changes and approvals must be in writing (text or email) to be binding.

9. No Refunds Once Work Begins

Once work has begun or equipment has been ordered, deposits and payments are non-refundable for labor and materials already committed.

10. Collection

Client is responsible for reasonable costs of collection, including attorney's fees. Provider reserves its rights under New York mechanic's lien law.

11. Client Responsibilities

Client provides safe access, working 120V power where equipment plugs in, clear work areas, and any required landlord, building, board, HOA or permit approvals.

12. Site Access, Appointments & No-Access Visits

12.1 Provider books 2-hour arrival windows. Client is solely responsible for having an adult with authority, keys and access at the site for the entire window, and for giving Provider a working contact phone number for that person. 12.2 Reaching building staff, tenants, supers, managers or other third parties is the Client's responsibility, not Provider's. 12.3 When the technician arrives, Provider will call and text the contact(s) on file. If no one provides access within 30 minutes of the technician's arrival, the visit is a completed No-Access Visit: the technician may leave, a prepaid service-call fee is fully earned and non-refundable, and on installations a trip charge equal to Provider's service-call fee for the area is billed. 12.4 A new appointment is booked only after any No-Access trip charge, or a new service-call fee, is paid. 12.5 Cancellations or reschedules with less than 24

hours' notice incur a $200 fee. 12.6 Provider may reschedule for weather, unsafe conditions or emergencies without penalty to either party.

13. Client-Provided Infrastructure, Internet & Network

13.1 No site survey or pre-installation punch list is included unless separately quoted and paid. 13.2 Client must supply, before the appointment: working internet service with adequate upload speed; a router or network switch with enough free LAN ports for every device being connected; router/ISP admin passwords; working outlets; and displays with compatible inputs. 13.3 A router or switch with no free ports, an ISP-locked or failing router, insufficient internet speed, missing passwords, old TVs without HDMI, or failed existing wiring are pre-existing Client-side conditions, not Provider defects. 13.4 Provider may, at the Client's choice: sell and install the needed part (for example a network switch) by change order at MSRP plus labor, or leave so the Client can obtain it. 13.5 Any return trip caused by a Client-side condition is a new service call billed at Section 5 rates, and the original invoice remains due in full on the original terms. 13.6 Provider is not liable for Client equipment, ISP, landlord or building delays.

14. Hidden Conditions & Drilling

Provider is not responsible for concealed conditions such as pipes, wires, asbestos or structural members not visible before drilling. Additional work caused by hidden conditions is billed by change order.

15. Data Loss

Provider is not responsible for loss of recorded video, settings or data on existing equipment during upgrades, resets or firmware updates.

16. Client-Supplied Equipment

16.1 When the Client supplies any equipment (cameras, recorders, doorbells, intercoms, locks, TVs, mounts, routers or other parts), Provider's work is labor only. 16.2 Provider makes no warranty and accepts no responsibility for the condition, compatibility, completeness, firmware, accounts, apps, performance or failure of Client-supplied equipment, including equipment that is defective, dead on arrival, missing parts or incompatible. 16.3 The quoted labor price is due in full once the work is performed, whether or not the Client-supplied equipment works. 16.4 Time spent diagnosing, configuring or working around Client-supplied equipment beyond the quoted scope is billed at Section 5 rates. 16.5 Any return trip to install replacement or additional Client-supplied equipment is a new service call billed at Section 5 rates.

17. Late Payment

Late balances incur a $50 flat fee plus 1.5% per month, capped at 25% of the contract value or the legal maximum, whichever is less.

18. Alarm Liability

Provider is not an insurer. Alarm equipment reduces but does not eliminate the risk of loss. Permits, registration and false-alarm fines are the Client's responsibility.

19. Camera Liability

Cameras record events; they do not prevent them. Client is responsible for lawful use, including New York recording, audio and privacy laws and any required signage.

20. Limitation of Liability

Provider's total liability is limited to the amount paid under this Agreement. Provider is not liable for consequential, incidental or indirect damages.

21. Acceptance by Conduct

Payment of the deposit or service-call fee, or allowing work to begin, constitutes acceptance of this Agreement.

22. Governing Law

This Agreement is governed by the laws of the State of New York.

23. Entire Agreement; Severability

The Proposal and this Agreement are the entire agreement and may be changed only in writing confirmed by both parties. If any provision is unenforceable, the rest remains in effect.

24. Acceptance

Client acknowledges reading and accepting these terms by signature, deposit or service-call payment, or authorizing work to begin.
